

KEY GEN TWO

SRF KEY V2

Just one key for all SENS products, that is both comfortable and safe to use. That's what the SENS SRF KEY always has been. But now we have created our next generation SRF KEY that also switches itself off automatically after a work shift. And that gives peace of mind when a key is lost or out of sight.

The SRF KEY V2 only works in combination with the SRF Key Activator. Inserting the key into the station automatically activates it so it can be used throughout the working day. Without having to fear a non-working key due to not being sufficiently charged. Thanks to the integrated battery. LED indicators show whether the key is active or not and indicate when the battery eventually needs to be replaced.

Oh yes, the new SRF KEY V2 can be used in combination with both existing and new SENS products. Which is very practical and convenient. As our customers have come to expect from us!

Highlights	SRF Key V2
Size	74 mm 36 mm 15mm
Battery	CR2450, replaceable
Operation	12 hours after activation Auto switch-off
Indicators	Multicolour LED
Article code	200 000 025
Highlights	Activator Station
Size	70 mm 55 mm 25 mm
Mounting	Adhesive or screw fix
Power Input	5V
Indicators	LED
Article code	200 100 025
